Coder 2

Theme	Code	Description	Example
Agency/Participatory Design	*Explicit feedback/Participation*	Expresses whether sentence includes explicit feedback from stakeholders	To keep this work responsive, districts, educators, parents, and students are encouraged to share feedback via frontierlearninglab.io/feedback. We will gather input annually, and updates will be published with explicit versioning (Montana page 4)
	Push for AI in education	Expresses whether the sentence includes markers for necessary inclusion of AI	Where might AI fit in the California schols (California old page 5)
Compliance with policies and law	*Compliance*	Expresses whether the sentence includes enforcement of state- or federal laws.	Policy and governance for AI in education in Montana must align with the state's legal framework, cultural commitments, and practical realities of largely rural school systems. Districts must ensure that any AI-related policy or practice is grounded in Montana law and responsive to local needs. (Montana page 12)
Problem framing	*AI as opportunity*	Expresses whether the sentence includes hyperbolic language around AI	Such applications have enabled anyone to use and understand the power of AI for learning and many other aspects of life. (Connecticut page 2)
	AI skilling as necessary	Expresses whether the sentence includes learning AI skills as necessary	The LDOE envisions a future where AI is a powerful tool to personalize learning, enhance teaching practices, and prepare students for

			careers. By equipping educators, leaders, and families with a deep understanding of AI, Louisiana schools will lead the nation in leveraging this technology to create safe, engaging, and innovative learning environments. (Lousiana page 2)
Structural artifacts	*Mnemonic framing*	Expresses whether the sentence includes mnemonics or abbreviations	THE SAMR MODEL: A MODEL FOR EFFECTIVE AI IMPLEMENTATION (Lousiana page 6)
Data Governance			
Actionability (or lack thereof)	*Aspirational language*	Expresses sentence with aspirational language	Personalize learning: Tailor instruction to each student's unique needs and pace (Lousiana page 6)
	Actionable frameworks	Expresses if segment includes actionable frameworks	Lousiana Page 10

Memo/Notes:

- Possibly pair with interviews? Policy as written versus policy as lived
- Who is imagined as responsible for AI oversight? Is it mostly shifted downward (to teachers) without resources?
    - Centralized versus decentralized
    - What are the roles defined?

        - Distrcits
        - Teachers
        - Schools
        - Vendors
    - Mandatory versus voluntary

- - Presence of advisory boards
  -

- Framing
- - Framing and purpose (how does a state frame AI)
- * Problem framing
- * AI as risk versus opportuity)
- * Innovation versus harm reducing
- * Workforce preparation
- - Goals
- - Improving learning outcomes
- - DEI, equity, access
- - Safety compliance
- - efficiency
- - Metaphors
- - AI as tool
- - AI as threat
- - AI as assistant
- - AI asdisruption

Equity and justice dimensions

- Digital divide concerns
- Language access
- accessibility for students with disabilities
- data harms to marginalized students
- Are commitments substantive or symbolic
- Concrete actions versus aspirational language

Data governance

- consent structures
- student surveillance
- FERPA references
- biometric data concerns
- AI logs as educational records

Who is left out in terms of stakeholders?
